Berlin, Germany • ashwinparthasarathy30@gmail.com

Machine Learning Engineer with 7+ years of experience delivering scalable AI and software solutions in cross-functional environments. Proven ability to design and deploy ML systems, modern application architectures, and MLOps practices on Azure and AWS. Combines strong software engineering foundations with a practical, product-focused approach to reliability, scalability, and production deployment.

Skills & Technologies

- **Languages:** Python, R, TypeScript, Go (basic)
- **Technologies & Frameworks:** FastAPI, Flask, Django, Docker, Terraform, CI/CD pipelines, Git, AWS (SageMaker, ECS, ECR), Azure (Databricks, Red Hat OpenShift), SQL, Streamlit, Power BI, Superset, MLflow
- **Expertise:** Machine Learning, NLP, Retrieval-Augmented Generation (RAG), Prompt Engineering, MLOps, Data Monitoring & Drift Detection, Model Deployment, Data Preprocessing, Predictive Modeling, API Development

Work Experience

Senior Analyst/MLE

[Mercor Intelligence](#)

November 2025 - December 2025

Berlin, Germany (Remote)

- **Elevated LLM output reliability by engineering domain-specific prompts and evaluation logic**, improving reasoning consistency across production language model workflows.
- **Designed advanced coding benchmarks and validated solutions** to strengthen training and evaluation datasets, improving model performance on technical problem-solving tasks.
- **Built reproducible ML pipelines in Python**, ensuring consistency between experimentation, evaluation, and production deployment environments.

Senior Analyst/MLE

[Tiger Analytics](#)

April 2024 - May 2025

Bengaluru, India

- **Architected and deployed a cloud-native FastAPI service on Azure Red Hat OpenShift**, enabling scalable delivery, CI/CD automation, and resilient enterprise ML service operations.
- **Implemented ML observability across data quality, drift detection, anomalies, and model performance**, improving reliability and operational visibility of production AI systems.
- **Migrated production ML workloads from Azure VMs to Azure Databricks**, improving scalability, pipeline throughput, and support for near real-time analytics.
- **Designed backend architecture integrating Retrieval-Augmented Generation (RAG)**, enabling enterprise LLM applications with improved retrieval accuracy and response relevance.

Machine Learning Engineer

[Neoware.a](#)

April 2023 - December 2023

Bengaluru, India (Remote)

- **Designed and deployed containerized ML systems using AWS SageMaker, ECS, and ECR**, enabling scalable model serving and production-ready inference workflows.
- **Built AI-driven document processing pipelines using Azure AI services and NLP techniques**, automating text extraction.
- **Engineered Python backend services for a data validation platform**, ensuring dataset integrity and reliability.
- **Productionized XGBoost models for real-time inference**, enabling automated decision workflows.

Software Engineer

[Wipro Technology Solutions.](#)

January 2022 - April 2023

Remote, India

- **Developed and integrated Python backend APIs using Django**, supporting scalable application services and improving system interoperability across internal tools.
- **Built data visualization interfaces using React and Material UI**, enabling clearer access to operational metrics.
- **Applied classification algorithms including Random Forest and SVM to structured datasets**, supporting predictive analysis and data-driven decision workflows.

- **Developed scalable Python-based automation frameworks**, writing modular, reusable code with strong emphasis on data validation, structured logic, and performance optimization.
- **Designed and maintained automated testing pipelines integrated with CI/CD workflows**, ensuring reliability, reproducibility, and deployment stability across environments.
- **Applied data-driven analysis to increase test coverage by 20%**, identifying failure patterns and improving system robustness across desktop and web applications.
- **Built structured validation systems using Python and Robot Framework**, leveraging analytical problem-solving to improve accuracy and reduce defect leakage.

Education

Executive Post Graduate Programme in Management, Indian Institute of Management	2021- 2023
Bachelor of Engineering - Mechanical, Anna University	2012 - 2016
PG-Level Advanced Certification Programme in AI and MLOPs, Indian Institute of Science	2023

Projects & Extra

AWS Certified Machine Learning - Specialty - (T6E3E1QL5NF4QLGR)	November 2023
Databricks Certified Machine Learning Associate - (130232698)	January 2025

Languages

- English: Professional Proficiency (C2)
- German: Basic Proficiency (A2)
